Evans M. Wood

(978) 618-5150 | evansminotwood@gmail.com | https://www.linkedin.com/in/e-minot-wood/ | https://evansminotwood.com

Education

Worcester Polytechnic Institute Worcester, MA
Bachelor of Science in Computer Science & Data Science, GPA: 3.84 *Expected May 2027*
- Dean's List (Six-Time Recipient)

Experience

Worcester Polytechnic Institute Fall Semester 2026
Community Advisor *Worcester, MA*
- Fostered the First Year experience for incoming students through community building and campus activities.

Worcester Polytechnic Institute: Pre-Collegiate Outreach Program Summer 2024 & 2025
Residential Program Advisor – Frontiers *Worcester, MA*
- Facilitated two in-person, two-week STEM programs for high school students, leading technical workshops.

E.H. Perkins Dec. 2020 – Jan. 2021
Website Developer *Hudson, MA*
- Redesigned and deployed corporate website using HTML, CSS, and JavaScript with responsive design.

Programming Skills

Languages: Python, TypeScript/JavaScript, Go, C, Rust, Java, SQL
Frameworks/Libraries: React, Next.js, Node.js, Gin, FastAPI, Prisma, Tailwind CSS
Cloud/Databases: AWS (Lambda, API Gateway, RDS), PostgreSQL, Redis, Docker, REST APIs
Tools: Git, Linux, OpenCV, OAuth 2.0/JWT, Tableau, LaTeX

Personal Works

Sonus | Next.js, TypeScript, PostgreSQL, Prisma, SoundCloud API
- Developed a full-stack music voting platform with real-time queue updates and OAuth 2.0-secured authentication.
- Designed a RESTful API with role-based access control separating public guest and protected host endpoints.
- Built an auto-advancing DJ playback system with vote-ranked ordering and played-track state management.
- Streamlined guest onboarding with QR code generation and shareable event codes, eliminating manual signup.

Aureus | Go, Next.js, Python, PostgreSQL, OpenAI CLIP
- Architected a microservices system with a Go REST API, Next.js frontend, and Python ML service.
- Integrated OpenAI's CLIP model with OpenCV-based multi-object detection for automated coin classification.
- Built an OCR pipeline for automated text extraction and connected external APIs for real-time price data.

Python-to-x86 Compiler | Python, x86 Assembly
- Engineered a multi-pass compiler with lexical analysis, LALR parsing, AST generation, and x86 code emission.
- Applied intermediate representation optimization and dataflow analysis to reduce redundant generated instructions.
- Supported functional programming constructs, including automatic garbage collection and lexically scoped closures.

Capstone

MQP: Knowledge Tracing for ASSISTments | Python, R, SQL, BKT/DKT/IRT Aug. 2026 – May 2027
- Conducting knowledge tracing research on ASSISTments randomized controlled trial (RCT) data to measure how instructional treatments affect students' learning speed on specific problem sets.
- Implementing and comparing BKT, DKT, and IRT models in Python, R, and SQL to quantify treatment effects on time-to-mastery.

IQP: Mount Washington Summit Virtual Tour Aug. 2025 – Oct. 2025
- Worked with a team of four to develop an interactive, self-paced virtual tour in collaboration with the Mount Washington Observatory and six sponsors.

Honors & Activities

Chapter President, Phi Sigma Kappa (PSK) – Led chapter operations, finances, and member development.

Vice President, Order of Omega (OoO) – WPI's Greek Life honor society for top fraternity/sorority leaders.

Member, Omicron Delta Kappa (ODK) – Leadership Honor Society | **Member, Upsilon Pi Epsilon (UPE)** – Computer Science Honor Society | **Member, IEEE**
